

QualityGrader

Potatoes

Onions

The QualityGrader offers a solution for the labor-intensive quality grading of (seed) potatoes and onions. To ensure accurate quality assessment, the quality grader works with a combination of artificial intelligence and advanced camera technology. By integrating these technologies into a structured and relatively simple sorting machine, the QualityGrader is the perfect solution for growers and processors. The QualityGrader excels in ease of operation and can sort up to 12 tons of product per hour.

Advantages

- ✓ Consistent quality control
- ✓ Easy operation
- ✓ Proven technology
- ✓ Labor reduction
- ✓ Increased sustainability
- ✓ Maintenance-friendly

We can implement the Divider into almost any processing line. Do you want to know if this machine fits your situation? We would be more than happy to advise.
